

Test Report

Norovirus was tested negative after 24 hours using Streamer irradiation.

Organization: Kobe university graduate school

Report No.: CZ07B001

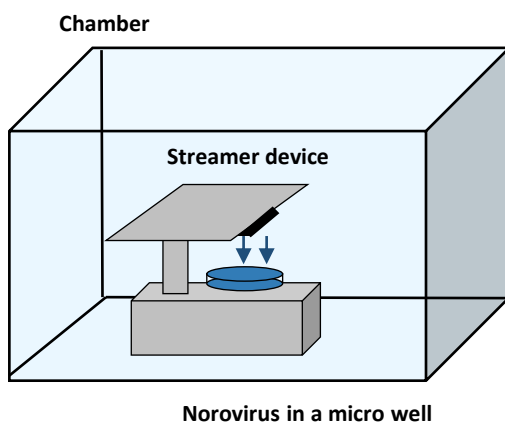

Report Date: 12-Jan-2007

Subjects: Norovirus

Result: Norovirus was tested negative after 24 hours

Method: ELISA method

Test Conditions

Test Results

Irradiation time	Absorbance (n=2 average)	Test
0	0.274	Positive
1	0.276	Positive
2	0.253	Positive
4	0.239	Positive
24	0.115	Negative

The residual states of norovirus placed in a micro well were observed throughout a 24-hour period under Streamer irradiation.

*This is the demonstration result using a streamer discharge device for testing. The effect of products equipped with Streamer technology or the effect in actual use environment may differ.
